

YOU'VE INVESTED IN THE WORLD'S FINEST PRESS BRAKE TOOLING...

PROTECT IT WITH:

PRESS BRAKE PRODUCTIVITY WAX

CLEAN & PRESERVE

When you selected WILA tooling for your press brake, you invested in the world's highest quality, most durable and most productive line of press brake tooling. With proper use and proper care, it will still be hard at work in new or like new condition well over ten years from now. To provide you with a cleaner and preservative that meets the rigid performance standards of our industry leading press brake tooling systems, WILA developed WILA Wax.

With WILA Wax, you'll get the following:

FEATURES AND BENEFITS

| |
|--|
| Specially developed to eliminate rust and corrosion on press brake tooling |
| Protects important laser marking on tooling |
| Acts as both a cleaner and a preservative |
| Effective in environments with high humidity and frequent operator tool handling |
| Extends tooling life by eliminating corrosion on critical surfaces |
| Environmentally safe |
| Has a long shelf life |
| Easy to apply |

OPTIMUM PERFORMANCE

Care for your investment in WILA press brake tooling with the tool that keeps it clean, protects it in even the harshest environments, and keeps it performing at optimum performance levels. Use WILA Wax. It's available now and only from WILA.
